The purpose of this amendment is to provide clarification regarding the following questions. Note, all other terms, conditions, specifications, requirements and criteria remain unchanged.

Question #1: Line Item #5 Lists the 7205 controller and asks for redundant power supplies. Redundant power supplies aren't available until you step up to the 7210. Did you want to go to the 7210 or stay with the single power supply 7205?

Response: *RRPS would like to stick with the 7205 and remove the redundant power supply requirement.*

Question #2: Line items 3,5,6,7,8,and 10 don't have the NBD exchange

requirement. Can you confirm that you RRPS's doesn't require this?

Response: *No, RRPS does not want NBD exchange on those items.*

Question #3: Will RRPS be installing switches, controllers and such? I see the WAP's installation in Part B, but no mention of the other electronics installation.

Response: *RRPS will install and configure our own switches and controllers in-house.*
